Detailed Action

Change of Examiner

The examiner of this application has changed from T. Wessendorf to Tomas Friend.

Status of the Application

Receipt is acknowledged of a response to a restriction requirement on 25 January 2002 (Paper No. 10).

Status of the Claims

Claims 1-62 are pending in the present application. Claims 1-21 and 42-62 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 10.

Applicants' traversal of the restriction between Groups II and III is acknowledged and, in response to applicants' argument, Groups II and III have been rejoined. Claims 22-41 are pending and are subject to election of species requirements.

Election of Species

Upon further consideration the examiner of this application has determined that an election of species is required. The examiner regrets any delay or inconvenience that this may cause applicants and will work with applicants to expedite the prosecution of the application.

1. This application contains claims directed to patentably distinct species of the claimed invention for each of the following A-D:

- A. ultimate species of marker protein (i.e. a specified protein, not a classification or family of proteins),
- B. species of signal (e.g. specific reaction, resistance to a specific antibiotic, etc.),
- C. species of N-terminal fragment, AND
- D. species of C-terminal fragment.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for **EACH of A-D** for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 22-28 are generic.

3. The species are distinct, each from the other, because they have different chemical structures with different chemical, physical, and biological properties, are made using different starting materials and/or methods, and/or are used in different environments. Therefore, different issues of enablement and patentability apply to each species and each species represents patentably distinct subject matter.

4. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, **and a listing of all claims readable thereon, including any claims subsequently added.** An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Tomas Friend** at telephone number **(703) 308-4548**. The examiner can normally be reached on Monday, Tuesday, Friday, and Saturday 8:00-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jyothsna Venkat can be reached on (703) 308-2439. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-2742.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist at (703) 308-1235.
